

Number values do not match: result and search section in the table

[Attach](#) [Create subtask](#) [Add a link to a task](#) [▼](#) [...](#)

Description

Description:

The number of search section results differs from the found number of campaigns in the table

Preconditions:

1.URL must be open:

[Metadata Challenge](#)

Steps to reproduce:

1. Enter the first letter of the company name from the table (for example "F")
2. Pay attention to the number of sections and the actual search result

Expected result:

The extreme value of the search section is equal to the number of results found in the table

Actual result:

The extreme value of the search section exceeds the found number of results in the table
